SAMSUNG SMARTTHINGS MULTIPURPOSE SENSOR:

CONNECTING DEVICE:

In the SmartThings mobile app:

1. Tap Marketplace
2. Under Things, tap Connect New Device (iOS) / Start Looking for Things (Android)
3. The app will say, I’m looking for Things... and display a spinning circle
4. While the Hub searches, move the Multipurpose Sensor within 15 feet of the Hub and pull the REMOVE TO PAIR tab on the sensor
5. When the device is discovered, the message # Thing(s) Found! will increment, and the device will list below
6. Tap the device to configure it
7. Tap to name the device
8. Tap Select a Room to assign the device to an existing Room or Add a Room
9. Tap Next
10. Follow the in-app prompts to configure the device
11. When you finish configuring the device, tap Done

TO RESET THE SAMSUNG SMARTTHINGS MULTIPURPOSE SENSOR:

If the Samsung SmartThings Multipurpose Sensor didn't connect to the Hub when you removed the pull-tab, reset and connect the device manually.

First:

1. Press the push-tabs on either side of the Multipurpose Sensor to remove the cover
2. Carefully remove the CR2450 battery using a flat tool

Next, put the Hub in join mode:

1. Tap Marketplace
2. Under Things, tap Connect New Device (iOS) / Start Looking for Things (Android)
3. The app will say, I’m looking for Things... and display a spinning circle

Last, while the Hub searches:

1. Move the Multipurpose Sensor within 15 feet of Hub
2. Hold down the Connect button on the Multipurpose Sensor while reinserting the battery
3. Release the button when the LED is lit
4. The LED will blink blue while attempting to connect
5. Once the app shows a device has been found, put the cover back on the Multipurpose Sensor
6. Follow the configuration steps above

TO REMOVE THE SAMSUNG SMARTTHINGS MULTIPURPOSE SENSOR FROM SMARTTHINGS:
If the Multipurpose Sensor is not performing as expected, you may need to reset the device and/or remove and reconnect the device with the SmartThings Hub.

To remove the device via the SmartThings app:

1. Tap **My Home**
2. Tap **Things**
3. Select the Multipurpose Sensor
4. Tap the gear icon 🛡
5. Tap **Remove**

Confirm removal (this cannot be undone)
